

Wireless True
4K

VisionShare **AD** series

perfectly paired for display in a true wireless meeting room

The AD models are meticulously designed with a compact form factor, specifically tailored for seamless integration with all displays. The 'D' in AD goes beyond mere displays; it symbolizes a holistic approach to meeting room solutions. The AD series epitomizes the ideal meeting room—interactive, seamless, and secure.

The spaces beneath an AD model are carefully carved out, creating a designated gap for the display frame to seamlessly fit in. Placed effortlessly on top of any display, the AD model completes your meeting room setup. The AD series boasts proprietary 60GHz technology, True 4K capability, content protection without data compression, hassle-free third-party software installation, and much more.

VisionShare **AD40**

Support any system

Compatible for any system include Windows / MAC / Android / Chrome without install software and driver.

Power direct from laptop

USB-C transmitter powered directly by a laptop; supports audio/video/power functions without data storage for the best security.

Plug' Play all devices

Plug'n play direct through HDMI or USB-C (DP support) without software, driver or app installations.

Super-Fast speed rate

Ultra speed up to 28 Gbit/s, which is more than 14 times faster than regular WiFi, offers a large bandwidth without video compression and no latency.

CEC function (consumer Electronics Control)

Supports the CEC function, which allows the source input to automatically switch and connect after plugging into the laptop.

HDCP/DTCP (content protection)

HDCP and DTCP are industry-standard that safeguard digital content from unauthorized copying and distribution, ensuring secure and protected content transmission over various devices and interfaces.

VisionShare mmWave Wireless Presentation

EXPERIENCE THE WIRELESS LIKE NEVER BEFORE

Ease of use

Through two cables—HDMI for signal and USB-C to A for power—VisionShare AD receiver is simple to hang on top of the display without a learning curve.

Efficiency

VisionShare empower you to save time, reducing redundancies, and ensuring that your team achieves optimal results in ever meeting. Say goodbye to unproductive meetings and hello to a more efficient and impactful collaboration experience.
